**User Stories 4**

This item hasn't been started

- CtExploredApp #19**  
As a developer I want to figure out have to have this bot run periodically and host this information for the website and app to request  
**Medium** 3
- CtExploredApp #17**  
As a User I would like to be able to contact CT Explored so I can ask questions/comments.  
**Low** 0 2
- CtExploredApp #15**  
As a User I would like to have a scrollable list of destinations in alphabetical order/searchable list of destinations (Reach goal).  
**Low** 0 1
- CtExploredApp #18**  
As a User I would like to change the size of the text so I can see it better. (Reach goal).  
**Low** 0 1

**Current Sprint 1**

These are stories in the current sprint.

- Draft**  
As a User, I would like a second walking tour with ~5 POIs so that the application's tours can be more thoroughly demonstrated  
**Medium** 4 2

**In Progress 3**

This is actively being worked on

- Draft**  
As a developer, I would like to extend the user DB schema to create a system to store and renew the Instagram access tokens.  
**High** 3 5
- Draft**  
As a developer, I would like to add Apple ID sign in to the user authentication system to allow for an additional account sign-in option for application users  
**High** 3 1
- Draft**  
As a developer, I will need to extend authentication flow so a user can link their Instagram account to their app/sign in account and store the necessary token for future requests.  
**Medium** 3 5

**Done 12**

This has been completed

- CtExploredApp #11**  
As a User I would like to select a POI so I can learn more about it.  
**High** 1 2
- Draft**  
As a Developer I would like to generate a hashtag with a unique user ID that will be added to the end of the generated text so that I can keep track of posts made by each user  
**High** 2 8
- Draft**  
As a Developer I would like to create an OAuth system that will allow the user to login using their Google/GitHub account so that the user has an account associated with the app and their data can be stored in the database.  
**High** 2 8
- CtExploredApp #9**  
As a Developer I would like to create the basic UI of the app, so I can create the rest of the functionality and have a basis to work from.  
**High** 1 3
- CtExploredApp #6**  
As a Developer I would like to clean up our datapassing in order to pull information from a single file, and have it pass necessary information down the App Views Stack  
**High** 2 3
