This item hasn't been started

Draft

As a developer, I would like to ensure that updates to Android/iOS do not break the app, also a problem fixing manual so users always have a smooth experience.

High21

Draft

As a user, I would like to post my photo to Instagram and contribute to my score on the leaderboard, so I can compete with others.

Medium131

Draft

As a user, I would like the app to recommend the best tour type for me (walking, biking, driving), so I can choose the most convenient option.

Medium3

Draft

As a user, I would like the ability to click a link directly from a POI to the full article in the magazine, so I can read more about that historical site.

Medium3

Draft

As a user, I would like to track my points on a leaderboard so I can see how I rank and earn rewards.

Medium8

Draft

As a user, I would like to listen to text-to-speech for POI descriptions.

Low13

Draft

As a user, I would like accessibility settings for easy navigation (e.g., larger buttons, high contrast).

Low8

Current Sprint4

...

These are stories in the current sprint.

Draft

As a user, I would like to navigate between POIs easily so I can complete the tour without getting lost.

High51

Draft

As a user, I would like a short tutorial that pops up when I first launch the app or access a new feature.

High5

Draft

As a user, I would like to link my app account to Instagram.

Medium81

Draft

As a developer, I would like to create or edit tours based on my client's directions so that the client's specific requests are implemented efficiently.
